

EVERCRETE DEEP CLEAN 500

HUNDREDS OF INDUSTRIAL, COMMERCIAL, AND RESIDENTIAL USES

Concrete	Food Service Agencies	Stone	Mobile Washers
Industrial Floors	Masonry	Gas Stations	Tile Floors
Commercial Kitchens	Machine Shops	Pool Decks	Auto Repair Shops
Stamped Concrete	Driveways	Freezer Floors	Trucking Companies

PLEASE READ THIS SHEET CAREFULLY BEFORE YOU START TO APPLY DEEP CLEAN!

PRODUCT DESCRIPTION

DEEP CLEAN 500 HEAVY DUTY DEGREASER is a non-toxic, fortified, concrete and multipurpose cleaner that is designed to clean and “etch” the surface simultaneously. Oils, dirt, efflorescence, and grime are removed. The primary use is to remove deeply penetrated oil stains and contaminated surface residue.

DEEP CLEAN 500 HEAVY DUTY DEGREASER may be used full strength as an environmental alternative to muriatic and other acids for surface preparation and basic cleaning. Architectural features are enhanced by removing the gradual build-up of atmospheric grime.

PRODUCT BENEFITS

- *Biodegradable
- *Easy shipping and handling
- *Non-toxic
- *High alkalinity for tough soils & grease
- *No streak rinse
- *USDA approved
- *Will penetrate Diesel smoke on trailers

APPLICATION

For best results do not dilute product or pre-wet surface. Prior to cleaning the entire surface, apply **DEEP CLEAN 500** to heavily saturated or hard to clean areas. Apply as needed and allow to “etch” the surface for approximately thirty (30) minutes. Rinse with clean water. Repeat as needed. See label for detailed directions.

INTERIOR APPLICATIONS

Interior cleaning is usually accomplished in a controlled manner. Normally **DEEP CLEAN 500** is applied sparingly to facilitate easier clean-up, unless the interior surface can be rinsed with high pressure water similar to an exterior surface. Normal care and protection procedures should be followed when working indoors.

RECOMMENDED DILUTION

A test patch is the best method to determine proper dilution rates. Full strength applications may damage sensitive architectural surfaces, but may be required for hard to clean areas.

MANUFACTURER'S GUARANTEE

DEEP CLEAN IS GUARANTEED TO PERFORM AS REPRESENTED WHEN USED AS DIRECTED. IF THE PURCHASER IS NOT SATISFIED THE MANUFACTURER WILL FURNISH, WITHOUT CHARGE, SUFFICIENT PRODUCT FOR ANOTHER APPLICATION.

PROPERTIES

Form	Liquid	Specific Gravity	See MSDS Sheet
pH	See MSDS Sheet	Toxicity	None
Flash Point	None		
Color	Dark Red		

TEST SAMPLE

A test patch is always recommended prior to cleaning architectural surfaces. Some surface damage may result from full strength application.

SAFETY

Refer to: Material Safety Data Sheet regarding hazards and personal protection.
